

# Araya Tsai

Apprentice

I am a Front-end Developer fourth-year Computer Science student at Bangkok University. I am interested in Front-End development and application development, and I have participated in a food ordering app project, which helped me develop skills in coding, using HTML, CSS, and JavaScript, as well as UI/UX design and problem-solving. I am eager to use this internship opportunity to learn new coding languages such as React, Flutter, and responsive web design, and I will strive to fully support the team's work without being a burden.
